Claims 29-31 have been amended.
Claims 29-31 are pending.

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. The rejection of claims 29-31 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is maintained. The recitation "consisting essentially of" in amended claims 29-31 is vague and indefinite. "Consisting essentially of" language is appropriate for claims drawn to methods and compositions, as it closes the claim to the addition of any materials other than those recited, except for impurities. However, "consisting essentially of" language is not appropriate for claims drawn to chemical structures, such as amino acid sequences. The nature of substitutions to the recited chemical structure encompassed by the claim is unclear. In the instant application, if the claims 29-31 are not drawn to peptides consisting of 5-20 contiguous amino acids of SEQ ID NO:27, it is uncertain what types of modifications to these peptide sequences is encompassed by the claim, for example; conservative substitutions of amino acid residues, single amino acid deletions, the addition of one or many amino acid residues, the addition of residues other than amino acids? The applicant is advised to amend the claim to recite "consisting of" and for examination purposes, the recitation "consisting essentially" will be interpreted as open language, as "comprising."
- 4. The rejection of claims 29-31 under 35 U.S.C. 102(b) as being anticipated by WO 92/21767 is maintained. WO 92/21767 discloses pharmaceutical compositions of the N-terminal peptide of the AgME20 antigen and methods of immunization and treating melanoma with said peptide that are the same as that claimed (see claims 37-49). The peptide (SEQ ID NO:1) is 100% identical to amino acid residues 25-53 of the instant gp100 polypeptide, is thus a "peptide having (comprising) 5-20 contiguous amino acids of gp100," and is the same as that claimed.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nancy Johnson whose telephone number is (703) 305-5860. The examiner can normally be reached on Monday through Friday from 8:30 am to 6:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Hutzell, can be reached on (703) 308-4310. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
